HT22I User Manual

Portable Programmer The Portable Programmer (PP) is used to carry information between the lock and the front desk equipment. It can also be used to open a guestroom and to test the operation of a lock. When the locks are first installed, the PP is used to initialize each lock to a particular room number, load its table of room codes, and set the

Onity, Inc. HT22 Users Manual

The portable programmer comes with a 6-ft DB9 male to DB9 male "HTCOM" cable. This cable is used to connect the Portable Programmer to the HT22 encoder. HT22 Encoder The HT22 is a powerful front desk check-in system that does not require a PC. Through the use of an easy-to-use keycard encoding unit you can manage up to 500

SmartAir TS1000 Portable Programmer

The Portable Programmer is powered with a 6LR61 type 9V DC Transistor alkaline battery. The programmer switches itself off if it has not been used for 30 seconds to prevent leaving the programmer on when not in use. The memory of the Portable Programmer is volatile, and hence if we remove the battery or if the battery runs
